Summary

Link to my GitHub: https://github.com/BrandonWu500

Self-taught Web Developer

Willing to relocate anywhere in the US or work 100% remote

My preferred tech stack would include:
- Next.js
- TypeScript
- Tailwind

I have created a personal project which combines everything I have been learning over the last few months. It's a car rental website that has a similar design to Airbnb.

Link to the GitHub repository (which goes into more detail about what tech stack and architecture I used):
https://github.com/BrandonWu500/car-rental-web-app

Link to production website:
